

# Scrum Expert Certified (CM-SEC)

## Certification Scheme

---

Our goal at CertMind is to certify the skills of professionals who perform in the context of Technology. To achieve this, we seek to ensure that professionals demonstrate their skills and knowledge by applying an International Certification Exam.

### Purpose

The purpose of certification as Scrum Expert is to demonstrate that the professional widely masters the structure, considerations and practices for the adoption of Scrum, as well as demonstrating extensive experience in project management based on Scrum.

### Certification process and requirements

Professionals interested in obtaining certification as Scrum Expert Certified (CM-SEC) do not need an additional course or exam, this is because at CertMind we are confident that people learn more when running experiments and practice with their project teams, therefore, to obtain the Scrum Expert certificate, the following requirements must be met:

1. Be certified as in the Scrum Practitioner certification lines (composed of Scrum Fundamentals, Scrum Master, Scrum Developer and Scrum Product Owner) and Scrum Coach (composed of Scrum Team Leader and Scrum Consultant).
2. Demonstrate experience of at least 12 months using Scrum practices, by applying these in one or more real-world projects of your choice, for this the professional must send evidence of:
  - Project name and project description.
  - Number of people involved.
  - The duration of the project.
  - Role held by the professional in the project (The roles allowed are Scrum Master, Scrum Product Owner, Scrum Team Leader, Scrum Consultant, Scrum Coach or equivalents).
  - A description of the work you did during the project.
  - Lessons learned and/or conclusions from the application of Scrum.

**Important note:** A letter from the company or customer with the information indicated above is accepted as evidence. The letter must have at least one contact person with which the information can be validated.

3. Complete the form that you will find on our website with the application request, after the review of the application.

## Certification Scheme

---

4. The review process can take up to 2 weeks, during this process (where applicable) we will send you feedback so that you can improve/change the evidence you sent us.
5. If the application request is denied, you will have up to 4 weeks to correct the evidence, otherwise your process will end here.
6. If the application application is approved, we will generate an invoice that corresponds to the certification process that includes: the review of the documents by an expert advisor, an interview with the professional and in case you apply the issuance of the certification as Scrum Expert and a letter of accreditation issued by CertMind attesting to the process applied.

If you are Scrum Expert, it gives you the possibility to work with us in the construction of new materials, participate in our agile congresses and many more benefits.
